PROJECTS

Chateease ↗   2024
React, Socket.IO, Tailwind, Material-UI, Framer Motion, Node.js, MongoDB
- Engineered real-time chat functionality and scalable user management for enhanced communication and interaction.
- Developed robust features including group creation, user search, friend request management, and multimedia file sharing, ensuring a comprehensive user experience.

Spotify Clone ↗   2024
HTML, CSS, JavaScript
- Developed a Spotify clone using HTML, CSS, and JavaScript, showcasing proficiency in DOM manipulation and web development fundamentals.
- Implemented features for music playback control, including play, pause, next, and previous functionalities, providing a user-friendly experience.

Ecommerce Store ↗   2024
React, Redux, RTK Query, Node.js, Express, MongoDB
- Created a TypeScript e-commerce site with Firebase authentication and an admin dashboard for revenue tracking.
- Added user-friendly features like product search, price sorting, and cart management with React Chart.js.

PassManager ↗   2023
React, Tailwind CSS
- Developed a secure password manager application using React and Tailwind CSS, allowing users to store and manage site names, usernames, and passwords locally. Integrated pagination feature for efficient data organization and retrieval using React Table.

Todo ↗   2023
React, SCSS, Node.js, Express, MongoDB
- A feature-rich note-taking application inspired by Notion, allowing users to create, organize, and collaborate on notes, tasks, and projects.
